SUMMARY

Experienced Angular Developer with 4.5+ years of expertise in building web applications using Angular framework and its supportive libraries. Committed to continuous learning personally as well as professionally and driving excellence within collaborative teams.

WORK EXPERIENCE

Senior Engineer – Angular Development

Dec'25 - till date

RESERVE BANK INFORMATION TECHNOLOGY PRIVATE LTD.

Navi Mumbai, Maharashtra, India

Project: ReBIT form builder

Domain: Banking and Financial Services (BFSI)

- Designed and built a strong **Design System (Angular 21+)** with reusable component, used by **25+** application across **RBI**.
- Developed a **Form Builder** Project using **Angular, ng-Prime, Formly, RXJS** and **Bootstrap** to create dynamic forms.
- Regularly upgraded applications and **sync with latest version**, created **DIST** builds for unsupported versions, and deployed them. Created **.TGZ** file for end user and deploy on **nexus environment** so user download dependency using **NPM**.
- Built custom components for RBI fields such as **Aadhaar, PAN, IFSC, MICR, OTP, Passport, Indian Currency, Pin code, cheque, file-upload-download-viewer, Account No., checkbox, digital signature** etc. component for faster operation,
- Implement generic **Themes (Aura, Material, Lara, Nora)** in application which is reduce CSS efforts overall applications.
- Improved application performance by simplifying **form creation** using **drag-drop approach**, save application by **80%**.
- Worked on REST API integration and backend enhancements using **Java** and **My-SQL**, including creating API endpoints for operations and system modules and deployed to **Dev, QA, and Production (Nexus)** via Jenkins **CI/CD pipelines**.

Software Developer - Angular Frontend

Jul'25 – Dec'25

NETXCELL LTD.

Navi Mumbai, Maharashtra, India

Project: CAS (Centralised Management System for RBI)

Domain: Banking and Financial Services (BFSI)

- Led Angular upgrade from **v8 to v21+**, including Material UI and Ng Prime etc., updates and all migration checklists.
- Developed dashboard using **Chart.js**, including mix chart and user selection base chart for data analytics.
- Developed **reusable components** such as tables, directive, currency pipe, function registry services, breadcrumbs, panels, and pop-ups etc. reused across multiple screens to ensure consistency and reduce development effort.
- Wrote maintainable, reusable business logic and asynchronous operations using **RxJS, Observables, and HTTP requests**.
- Applied **lazy loading and lazy module** and routing guard strategies with optimized application performance.
- Extend hands into **java** backend services like writing Api's and deployments using **CICD Jenkins** and **build Piper**.
- UI/UX layouts** compatible with all screen sizes using CSS Grid, Flexbox and media queries.
- Experienced in **Scrum methodology, CI/CD pipelines**, and **version control** using Git, ensuring collaborative workflows.

System Engineer - Frontend Angular Developer

Mar'22 – Jul'25

TATA CONSULTANCY SERVICES PVT. LTD.

Thane, Maharashtra, India

Project: Incident Management Tool

Domain: Security / Privacy

- Developed and maintained scalable, responsive front-end applications using **Angular (up to v19)**, delivering seamless user experiences across **mobile, tablet, and desktop** platforms.
- Integrated **Apex Charts** for visual analytics, providing real-time data insights to end users.
- Implemented **RxJS** for asynchronous operations and **NgRx** for predictable state management, along with **Reactive forms** and Template-driven Forms featuring dynamic controls and custom and dynamic **validation**.
- Optimized application performance with **lazy-loaded modules, route guards, and authentication** via HTTP **interceptors**, while integrating RESTful APIs in collaboration with backend teams.
- Participated in **Agile/Scrum** ceremonies and utilized **Git version control** strategies to coordinate with **40+** developers, reducing merge conflicts and ensuring smooth code integration.

Project: TATA Trent (Westside, Zudio, Landmark and Utsa)

Domain: E-Commerce / Retails

- Developed and maintained responsive web pages using **Angular v8, HTML5, CSS3, and TypeScript**.
- Utilized **RxJS** Observables for asynchronous data handling and event-driven programming.
- Experienced in debugging and **troubleshooting** Java code, resolving production issues, and optimizing API performance. Also contributed to designing and developing **REST APIs** to support business features.
- Experienced in **database optimization**, data integrity management, and **troubleshooting** performance issues.
- Collaborated with team members in an **Agile / Scrum** environment, participating in sprint planning and code reviews.

SKILLS

Frontend: Angular 8–21+, Angular Material, Ng-Prime, Angular Formly, RxJS, NgRx, JavaScript, TypeScript, Chart.js, Apex Charts, HTML5, CSS3/SCSS, Bootstrap, Tailwind CSS, VEX-Angular (Paid lab.), Material-icon, Ng-Prime Icons, UI/UX and Figma

Backend: Core Java, REST APIs

Databases: Oracle PL/SQL, MySQL, MongoDB, Elasticsearch

DevOps & Tools: Jenkins CI/CD, Jasmine, Karma, Git, SonarQube, Azure DevOps, Jira, Postman, PL/SQL tool, MySQL Workbench

Concepts: Micro-frontend, Server-side Rendering, Agile/Scrum, DAST/SAST security, API integration, State management (NgRX).

EDUCATION

Bachelor of Engineering (B.E) from Savitribai Phule Pune University, Pune

8.36 | 2018-2021 | Nashik, India

CERTIFICATE

- Certificate of Recognition Q2
- Professional JAVA Developer
