SUMMURY

Experienced Angular Developer with 4+ years of expertise in building web applications using Angular framework and its supportive libraries. Committed to continuous learning personally as well as professionally and driving excellence within collaborative teams.

WORK EXPERIENCE

Senior Engineer – Angular Development Dec'25 - till date
RESERVE BANK INFORMATION TECHNOLOGY PRIVATE LIMITED Navi Mumbai, Maharashtra, India
Project: ReBIT form builder **Domain: Banking and Financial Services (BFSI)**

- Designed and built a strong **Design System (Angular 21+)** with reusable component, used by **25+** application across **RBI**.
- Developed a Form Builder Project using **Angular, ng-Prime, Formly, RXJS** and **Bootstrap** to create dynamic forms.
- Regularly upgraded applications using the **n-1 approach**, created **DIST** builds for unsupported versions, and deployed them.
- Built custom components for RBI fields such as **Aadhaar, PAN, IFSC, MICR, OTP, Passport, Currency, Pincode, cheque, file-upload-download-viewer, Account No., checkbox, digital signature** etc. component for faster operation,
- Implement generic **Themes (Aura, Material, Lara, Nora)** in application which is reduce CSS efforts overall applications.
- Improved application performance by simplifying **form creation** using **drag-drop approach**, save application by **80%**.
- Worked on REST API integration and backend enhancements using **Java** and **My-SQL**, including creating API endpoints for operations and system modules and deployed to **Dev**, **QA**, and **Production (Nexus)** via Jenkins **CI/CD pipelines**.

Software Developer - Angular Frontend Jul'25 – Dec'25
NETXCELL LTD. Mumbai, Maharashtra, India
Project: BPCL In & Out store (Bharat Petroleum Corporation Limited) **Domain: E-Commerce / Retails**

- Led Angular version migration from **v8 to v19**, including Material UI updates and all migration checklists for transition.
- Developed dashboard using **Chart.js**, including **doughnut, pie, mixed chart types and bar charts** for data analytics.
- Developed **reusable components** such as tables, breadcrumbs, panels, and pop-ups etc. reused across multiple screens to ensure consistency and reduce development effort.
- Wrote maintainable, reusable business logic and asynchronous operations using **RxJS, Observables, and HTTP requests.**
- Applied **lazy loading and lazy module** and routing guard strategies with optimized application performance.
- implemented responsive **UI/UX layouts** compatible with all screen sizes using CSS Grid, Flexbox and media queries.
- Experienced in **Scrum methodology, CI/CD pipelines**, and **version control** using Git, ensuring collaborative workflows.

System Engineer - Frontend Angular Developer Mar'22 – Jul'25
TATA CONSULTACY SERVICES PVT. LTD. Thane, Maharashtra, India
Project: Incident Management Tool **Domain: Security / Privacy**

- Developed and maintained scalable, responsive front-end applications using **Angular (up to v19)**, delivering seamless user experiences across **mobile**, **tablet**, and **desktop** platforms.
- Created reusable UI components with **Angular Material UI**, and custom elements **(Dialogs, Dropdowns, Toggles, Expansion Panels, Date / Time Pickers, Forms, Tabs, Grids)** to enhance usability and accessibility.
- Integrated **Apex Charts** for visual analytics, providing real-time data insights to end users.
- Implemented **RxJS** for asynchronous operations and **NgRx** for predictable state management, along with **Reactive forms** and Template-driven Forms featuring dynamic controls and custom and dynamic **validation**.
- Optimized application performance with **lazy-loaded modules**, **route guards**, and **authentication** via HTTP **interceptors**, while integrating RESTful APIs in collaboration with backend teams.
- Participated in **Agile/Scrum** ceremonies and utilized **Git version control** strategies to coordinate with **40+** developers, reducing merge conflicts and ensuring smooth code integration.

Project: TATA Trent (Westside, Zudio, Landmark and Utsa) **Domain: E-Commerce / Retails**

- Developed and maintained responsive web pages using **Angular v8, HTML5, CSS3,** and **TypeScript**.
- Utilized **RxJS** Observables for asynchronous data handling and event-driven programming.
- Experienced in debugging and **troubleshooting** Java code, resolving production issues, and optimizing API performance. Also contributed to designing and developing **REST APIs** to support business features.
- Experienced in **database optimization**, data integrity management, and **troubleshooting** performance issues.
- Collaborated with team members in an **Agile / Scrum** environment, participating in sprint planning and code reviews.

SKILLS

Frontend: Angular 8–21+, Angular Material, Ng-Prime, Formly, RxJS, NgRx, JavaScript, TypeScript, Chart.js, Apex Charts, HTML5, CSS3/SCSS, Bootstrap, Tailwind CSS, VEX-Angular, Material-icon, Ng-Prime Icons,

Backend: Core Java, REST APIs **Databases**: Oracle PL/SQL, MySQL, MongoDB, Elasticsearch

DevOps & Tools: Jenkins CI/CD, Jasmine, Karma, Git, SonarQube, Azure DevOps, Jira, Postman, PL/SQL tool, MySQL Workbench

Concepts: Micro-frontends, Agile/Scrum, TDD/BDD, Secure Coding (DAST/SAST), API integration, State management (NgRX)

EDUCATION

Bachelor of Engineering (B.E) from **Savitribai Phule Pune University, Pune** **8.36 | 2018-2021 | Nashik, India**

CERTIFICATE

- Certificate of Recognition Q2 Link | Dec 2024 | TATA Consultancy Services Pvt. Ltd
- Professional JAVA Developer Link | April 2023 | SQUAD InfoTech Pvt. Ltd
