SUMMARY

Angular Developer with 4.5+ years of experience in designing and developing scalable enterprise web applications using Angular (8–22+) and its feature, Supported libraries. Experienced in building reusable component libraries, Design Systems, and metadata-driven Form Builder applications for the Banking and Financial Services (BFSI) domain. Passionate about developing reusable, maintainable, and high-performance applications while contributing to end-to-end software delivery.

WORK EXPERIENCE

Senior Engineer – Angular Development

Dec'25 - till date

RESERVE BANK INFORMATION TECHNOLOGY PRIVATE LTD.

Navi Mumbai, Maharashtra, India

Project: ReBIT form builder

Domain: Banking and Financial Services (BFSI)

- Developed Design System (**Angular 22+**) with **50+ reusable** components, pipes, services, used across **25+ RBI** applications.
- Developed a **Dynamic Form Builder** Application targeting **low code platform** practice, allowing users to create forms through **Drag-and-Drop** and **JSON** configuration reduce developer CSS effort by **50%**.
- Built reusable **RBI-specific components** such as **Aadhaar, PAN, IFSC, MICR, Passport, UTR, Vehicle Number, Currency, Matrix Grid, Grid with Validation, Account Number, Cheque, Digital Signature, File Upload/Download/Viewer comp.**
- Developed reusable Formly custom field types, **wrappers, validators, expression, hooks** and **custom events** to support dynamic forms and reduce duplicate development.
- Published Angular libraries as **versioned NPM (.TGZ)** packages through **Nexus Repository**, enabling easy installation and version management for multiple **RBI applications**.
- Upgraded Angular and maintained **compatibility (without --force / legacy peer deps)** across multiple **Nexus Release**.
- **Creating DIST builds for unsupported versions like Formly 7+ and primeng 22+(licence version from 22).**
- Improved form development by using **Drag-and-Drop** form designer, reducing manual effort by approximately **70%**.
- Integrated REST APIs and contributed to backend enhancements using **Core Java** and **MySQL** for dynamic form
- Participated in **Jenkins CI/CD pipelines**, code reviews, and deployments across **Dev, QA, UAT, Pre-Prod** and **Production**.

Software Developer - Angular Frontend

Jul'25 – Dec'25

NETXCELL LTD.

Navi Mumbai, Maharashtra, India

Project: LPG (Liquid Petroleum Gas)

Domain: Retail

- Led the Angular migration from **v8 to v19+**, upgrading Angular Material and RxJS while resolving deprecated.
- Designed and developed a shared **reusable component** including tables, dialogs, breadcrumbs, loaders, panels, dropdowns, autocomplete, directives, pipes, and utility services used across multiple modules.
- Developed dashboards using **Chart.js** with dynamic charts based on user-selected filters and business requirements.
- Used REST APIs and **GraphQL** APIs, writing reusable **GraphQL queries** from Angular to retrieve data through **Elasticsearch**.
- Used **RxJS Observables** for asynchronous operations and reusable business logic across the application.
- Implemented **lazy loading, route guards, and HTTP Interceptors** to improve application performance and security.
- Participated in **Azure** pipelines, release management, and deployments to **Dev, QA, UAT, Pre-Prod** and **Production**.
- Worked in Scrum environment using **Git** and **Azure DevOps Tool**, participating in **sprint planning, reviews, daily DSMS**.

System Engineer - Frontend Angular Developer

Mar'22 – Jul'25

TATA CONSULTANCY SERVICES PVT. LTD.

Thane, Maharashtra, India

Project: Incident Management Tool

Domain: Security / Privacy

- Maintained responsive applications using **Angular(v16–v19), Material, TypeScript, HTML5, CSS3, SCSS, and Bootstrap**.
- Contributed to the migration of **legacy AngularJS application to Standalone Angular 16+**, converting existing modules, components, services, and routing while ensuring application and stability to run both versions together.
- Developed **Reactive Forms, dynamic forms, and custom validations** based on business requirements.
- Integrated **Apex Charts** to display **dashboards** and real-time incident reports.
- Implemented **HTTP Interceptors, lazy loading, and route guards** to improve security and application performance.
- Worked in **Java REST APIs**, resolved production issues, and database changes using **Oracle PL/SQL** and **procedure**.
- Participated in **Jenkins CI/CD** deployments, release activities, and supported **Dev, QA, UAT, and Production** environments.
- Worked in **Scrum, sprint, DSM's, retrospective, Demo** and used **Git** and **Jira** for collaboration with **40+ developer**.

Project: TATA Trent (Westside, Zudio, Landmark and Utsa)

Domain: E-Commerce / Retail

- Develop & maintain responsive web applications using **Angular 8, TypeScript, HTML5, CSS3, Bootstrap, and JavaScript**.
- Created **reusable components, services, and directives** to reduce code duplication and improve development speed.
- **Integrated REST APIs and used Promise** to handle asynchronous data and API responses.
- Fixed bugs, resolved production issues, and worked with backend Java team for API integration and data changes.

SKILLS

Frontend: Angular (8–21+), Standalone Components, Signals, GraphQL, Angular Material, PrimeNG, Angular Formly, RxJS, NgRx, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Chart.js, Apex Charts, ng CDK, VEX Angular, Figma

Backend: Core Java, Spring Boot (Basic), REST APIs

Databases: Oracle PL/SQL, MySQL, MongoDB, Elasticsearch

DevOps & Tools: Git, Jenkins CI/CD, Azure DevOps, Nexus Repository, SonarQube, Coverity, Jira, Postman, Swagger

Architecture & Performance: Design System, Reusable Component Libraries, Angular Library Development, NPM Package Publishing, Mono Frontends, Micro Frontends, SSR, Performance Optimization, Bundle Optimization, Code Splitting, SBOMB

Methodologies: Agile (Scrum), CI/CD, DAST, SAST, API Integration

EDUCATION

Bachelor of Engineering (B.E) from **Savitribai Phule Pune University, Pune**

8.36 CGPA | 2018-2021 | Nashik, India

Technical Diploma (Diploma) from **MSBTE, Mumbai**

71.39 % | 2015-2018 | Nashik, India

10th (SSC) from **Maharashtra State Board**

81.60 % | 2014-2015 | Nashik, India

CERTIFICATE

- Certificate of Recognition Q2
- Google Cloud Certified Associate Cloud Engineer
- Professional JAVA Developer
